

## Southern Nursing Research Society

Mark your calendars! As SNRS gets ready to invite you to submit an abstract for the Student Poster, Late-Breaker and Evidence-Based posters for its 26th Annual Conference, "Nurse Scientists as Crucial Partners to Health Delivery".

The abstract submission site will open on Thursday, September 15, 2011 8:00 am CDT and will close Monday, October 3, 2011 5:00 pm CDT. There will NOT be an extension this year. [Click here](#) for more information prior to submitting your abstract.

- **Student poster** abstracts may be submitted by students currently enrolled in programs, as well as members who completed the work while a student (in the previous year). These abstracts must describe completed research (may be preliminary findings) or methodology abstracts (innovative methodologies).
  - The student must be the first author (presenter) of the abstract, though additional authors may be faculty advisors or others. Students who are submitting abstracts are strongly encouraged to read the [submission guidelines](#), view the [exemplar abstracts](#) and listen to the videos on how to prepare and submit an abstract.
  - Please note that the student must attest ([see special statement that must be signed by the faculty advisor or designee](#)) that the faculty advisor or designee has read and approved the abstract submission.
- **Late breaker** abstracts allow presentations of cutting-edge research which was not available at the time of the regular abstract deadline (June 2011).
- In addition we are inviting our nurse scientists in practice (Magnet hospitals, VA nurse scientists training programs, etc.) to submit abstracts of research and **evidence based practice**.

We look forward to receiving your 2012 abstract and seeing you in New Orleans, LA.

Thank you,

Anne Turner-Henson  
Vice President

### Thank you to our current SNRS 2012 Sponsors!
